I just reinstalled renegade onto my computer after deciding to give this game another shot. However, every time I try to load it, windows says that the program has stopped. I'm running Vista 32bit and changed the comparability to run it as XP SP2 and administrator. Still no luck with the original renegade build or its latest patch. The same error occurs with renguard 1.037, here are the error details:

Problem Event Name: APPCRASH
Application Name: game2.exe
Application Version: 1.37.0.1
Application Timestamp: 3e304677
Fault Module Name: game2.exe
Fault Module Version: 1.37.0.1
Fault Module Timestamp: 3e304677
Exception Code: c0000005
Exception Offset: 003947a0
OS Version: 6.0.6001.2.1.0.768.3
Locale ID: 1033
Additional Information 1: 50c9
Additional Information 2: 3cb49ea7af1d827a5b65d4e313794342
Additional Information 3: 1815
Additional Information 4: 43a3d19a9bbc8fe7bca9b007f9356bec

I've been trying to fix this thing forever, any help would be greatly appreciated. Thanks!

It looks like you're not running game2.exe in administrator mode. You probably just have RenGuard running in administrator mode.

i have tried what u said

Get my launcher tool from the post linked in this forum's FAQ and try it. You should also turn off any "Compatibility Settings" when you are using it as Renegade doesn't really need them...

Copy/paste just the files inside the folder into Renegade's main folder.

I do have a mic, however I really am not a person to give tech support when you don't know how to copy/paste files because I tend to have the people skills of an atomic weapon

Alright, but don't be terribly surprised if I start sounding mean

What's the teamspeak info?
