you mean barrel rolls?

But the more that you swap to the left and dive?

So a big dive to the left asif the plane was charging in for a target.

Hmmz you can easily adjust the angle of the steering (rolldegree)+ when a player use C it will look asif it is diving. Only it will affect regular steering.

hit and hold left CTRL and hit A or D and see what happens. This works only with flying stuff.

---

enjoy. (maybe not the answer lol)

Works with the subs in APB, too. It's kinda funny.

when flying, hold Ctrl and then press "A" or"D", u will move pif than just normal "A"or"D". (I have the same effect, but if i hit Foward/Back (as in internet shortcut keys) it does the same thing, lol).
