A bit more info: brenbot (new.brenbot.com) supports a rank plugin, which creates a ladder for your server. I suppose cloudy serve does the same, I never used it, though.

Brenbot has the "fdsstatus" plugin but it will not show any images of the map. You'll need to make your own script that adds those depending on the map the fdsstatus plugin indicates.

http://www.dtclan.de/include.php?path=ccrserver/AoW.php
looks nice but doesnt work:
Warning: fsockopen() expects parameter 2 to be long, string given in
/www/htdocs/w0071c38/www.dtclan.de/ccrserver/renegade_server.php on line 163
