Hi all,

I have TFD Renegade. I been having this "issue" for while now. My log files that records all in-game chatter is not recording. Only 2 files are there named "client datexxxxxxxx"

Why are they not being created? Or why is there a delay? It always used to wok great with my other 2 standalone Ren serials.

thank u!

IIRC this is not a standard ren feature but introduced by scripts. Check "BHS" in the options menu, I think there's a "record client logs" or something there.

hmm...I am not seeing the BHS options. I have the scripts 3.XX installed.

edit: I will look around at this later. thx Gozy
