What happens when you try to use WOL/XWIS?

If I put my game disk in, all it does is load the page that I posted a picture of and it won't load even the regular single player game.

(Sorry, yes I'm a n00b again...its been 4 years since I played) Thanks for the help though.

You need a new bandwidth.dll or you forgot to install Renegade 1.037 patch before installing renguard or other core patches.

Put the file in your ren folder (if you cant find it use the little search bar in the startup menu)

You'll have to reinstall Renegade, I'm afraid. Check the "reinstall" sticky in this subforum.
