On the topic of C4 and Proxies and Timed, What if a person were to quickly plant 5 proxy mines on your APC; front bumper and sides just before you rush the tower, maybe it would cause a little extra damage, maybe hurt a few people on the way in? Usually the tower is a bee hive of people when you get there and you usually run over or pass a few fellows as you near AGT. The only problem I can see is as each proxy goes of it would damage APC even if friendly fire is off?Is it a wastefull use of 5 of the 30 available mines?

You seem proud of your evil deeds, have you no shame, does it feel good to attack the enemy base, it's bad enough I think of something bad, but to support me in this is terrible.I feel guilty and am going to try talking nice to my enemy and maybe they'll give the base up or at least say, 3 minute truce where we all meet in the middle of a field and get to know oneanother.
