I decided to release this skin since everyone is releasing their skins.

Toggle Spoiler

Optional skins:

Toggle Spoiler

This is my first skin pack, tell if the color is too bright for you.

I'll be releasing my Blue Nod Buildings and Characters soon.

I can't upload it here due to the maximum size limit of files.

This is also available in game-maps.net, thanks IronWarrior for uploading it.

TIP: then put either slashes like the ones prisoners mark on thier jail sells, or just have damage marks slashed through the gdi hawks.

They're pretty alright skins, I'd remove the GDI logos though. Too detailed to be realistic, they'd most likely just make slashes.

Unless Kane hands out GDI logo stickers to his pilots. That's awesome.
