Ok, i made a forest camo skin for the C-130, but it didn't turn out the way i hoped:

So, can anyone help me make it better? I'm going to make a desert camo version of it, wich is less noticable the dif in color, and loks better, but i still want help on this one. Here the dds file so anyone can help.

=samous

edit: all i did was change the light gray to green, and the dark grey to brown.

It's a good effort. Perosnally, I'd get a camo texture and apply it to the whole skin (maybe excluding stuff like windows and doors though).

Also, it kinda has been done already
