You can't add music to a standard image like .jpg or .gif for example, you need to create a flash file.

Paste your image into it and then create an event for it to start playing sound upon load, mouse hovering, mouse click, etc.

It can be done but not in a standard .jpg or .gif file format. You would need to use some kind of markup language. Javascript would probably be the easiest method.

It probably wouldn't be a quick job and it wouldn't work on a forum in signatures.

flash for the win.

do it like this
http://getsm0ked.deviantart.com/art/2-Hot-Records-Flash-Buttons-33528637

OR
you're the man now dog
