First id like to thank Di3HardNL, Vancer 2 and ErroR for doing a fantastic job on converting Reborn weapons and Characters to Renegade.

And i would also like to thank the Reborn team for creating these fantastic models and textures that they have made from the Renegade Engine.

I would like to ask if you can do as many as possible and upload them into packs and release them, so people don't have to go searching all over the Forums for them.

If so, i would ask that the community try to town down the post in this thread, so if they DO decide to reply and add what they have done it will be easier to find... And i will also update this post with any links they post.

Thank you.

Oh and feel free to post request here also

(These models and textures were created by the current Reborn Team at http://cncreborn.planetcnc.gamespy.com/ all credit goes to them for these models and textures from Reborn)

DutchNeon wrote on Tue, 23 December 2008 15:07Please credit Renardin and/or his mod, when releasing his/their stuff. They worked on the models/textures, and a credit to them would be good.

Just so that they won't stop releasing Betas to the public, and that they just see us as 'thieves' (and with us, I mean the public)
