Im wondering cause i really really badly need this. is there a plugin for commander and stuff.

like i mean GDI:Commander Nod:Commander

like that, that can use !weapon !veh, and stuff along those lines. is there anything out there that has that for Bren Bot, Or NR, Or Anything Or just a server side mod?? It would be very helpfull if someone could help me with this!

There is no commander plugin for any regulation bot. The commander status was something made by Black-Cell for Black-Cell and I should think its going to stay that way.

Black-cell doesnt only have it. the st0rm server has it, and a few other server have it. so i dont think it was intended to stay with black-cell.

St0rm have it directly in bot which is based on Java.

SK-Gaming have it also in bot and their bot is based on mIRC.
