I do not know how to change the ingame font, not the font colors.
Please help.

not the font colors.
Please help.

The fonts used ingame are saved in a file called stylemgr.ini
Open this file and change the fonts by replacing the standard "Ariel" to what ever font you
want(take note you need whatever font you wanted to use already installed on your comp in order
to use it in ren)

Some parts you can't change in stylemgr.ini

Like the part in game where you can see this :

You have to edit that part in photoshop, the letters have a texture
Change its shape by editing the alpha channel of this texture

Here you can see the tga file. its font6x8.tga

I do not have photoshop.
I know someone told me there's a loop hole in the agreements, but I don't want to exploit it.
EDIT:Got GIMP to do it, thanks Di3HardNL.
