I originally asked ACK if he could help me resolve this problem but when i asked him if he could help he said no. It's to do with the helipads available at renrealm. I just want to know how to get the helipad to proxy in the agregates made by stonerook included with the helipad. Currently in renX there is a proxy bone for the agregates but when you import to leveledit the bone spawns an A-10 which is annoying because it respawns after each save. The agregates are included in another gmax file with the helipads. I just want to know if anyone had got these working with destruction agregates or have a helipad model of their own they don't mind me using that has working agregates.

what, and you though ACK was going to help you use his helipads, for Stonerooks agregates  
No offence, but thats a little moronic.

I don't see why, you always have to start some where. I would like to help you, but I don't have the Helipads, so I have never tried them.

Or maybe I don't have all the time in the world to reply to every single person who begs for help.

I have other things to do besides sit here and give help all day, idiot.

Who is the arrogant one? He makes it so you can use it whenever you want, and he continues to make great stuff, even getting better. And you expect that it's his duty to hold your hand and teach you to do simple shit that you could figure out if you just would take the time and try to learn something on your own instead of throwing words like arrogant around.

I don't need him to hold my hand, I don't need his help. Never will. If I want to learn something, I will learn by myself. I don't use his stuff. I agree he makes great stuff.

I directed that at the whiney little fools. Not you, but he isn't arrogant. He simply is straight forward, he has not the time.

Oh ok, my apologies. I thought you were talking to me since I was the one who called him arrogant.
