I'm wanting to start a websites geared towards FPS games. I want to setup a bunch of servers but I kind of need someone to help me manage them. The website will be www.AlwaysFPS.com, still looking for a skin but I would like to setup the servers first.

Here are the games I would like to setup servers for and need admins for:

Unreal Tournament 3

COD 5 and possibly 4

Crysis Wars

Frontlines: Fuel of War (already have 2 up)

And anymore you can think of

If you are interested in being a head admin for some of the gameservers let me know. You'll be a mod on the website forums as well. Just need to get the gameservers up first so it people will come and register.

PM me if you are interested.

I'm honestly not sure this is the way to get quality people on board. Good luck, though .

left4dead is really popular right now but due to the way it connects users it is kinda lame to host for. Were running COD5 and with so many servers it is hard to keep the server active right now.

The only game I'd really be able to play, out of the list, is CoD4. If you do go ahead with a CoD4 server, I'd gladly help out.

Well, I need people who can set up a COD server, not just moderate it but actually set it up.

Are you using a windows or linux dedicated server. I can set up either but I don't have the time to dedicate to the Linux setup right this second. But I would in the next week or two.

Unfortunately for most I'm only willing to dedicate some Windows Boxes. I'm maxed out with the Linux server so I can't put any gameservers on those. So if you know Windows hit me up on MSN: David@dmehosting.com

speedy you know where to find me if needed.. so if your list of admins lack names hit me up.

Only thing is at the time being my desktop is unable to play any of the games you've listed, but in the next few months i'll be building a new one.

If you could provide me with some insight about CoD4 RCON and writing my own wrapper, I'd gladly appreciate it!

OT: I'd help, but I'm trying to start my own community atm...

setting up cod4 or 5 or whatever isnt that hard to do.

example:

start.bat

"C:\Program Files\Activision\Call of Duty - World at War\CoDWaWmp.exe" +set dedicated 2

+exec server.cfg +map_rotate

server.cfg

File Attachments

Not hard to set up CoD4/5 servers. Doing that myself also

If you need help, hit me up with a PM
