=samous
UT3 is Unreal Tournament 2003, the game that Renegade X is being developed on.

Unreal Tournament 3 and Unreal Tournament 2003 are two completely separate games.

Apparently the series used the year of the release until after UT2004, and then the next one was called UT3. Weird.

I don't have any of them, so yeah, excuse my lack of knowledge on the naming.

The 3 in Unreal Tournament 3 represents the engine version (Unreal Engine 3), I'm going to let you guess on what the 2003 stands for in UT2003.

The mod is not out yet but we do have a map you can play. It is the Vehicle Capture the Flag

---

gametype with all Unreal assets (no Renegade X assets) but it is an Unreal remake of Hourglass.

http://www.moddb.com/mods/renegade-x/addons/vctf-hourglass

With UT3 installed, extract the files to "My Documents\My Games\Unreal Tournament 3\UTGame\Published\CookedPC\CustomMaps" and it will show up in your map list under the VCTF gametype.

Or in Vista I think that's just "Documents" without the "My".

If the "CustomMaps" folder doesn't exist inside "CookedPC" then create it.
