I cant get gmax material editor to open not sure what happened.
I press M nothing happens i tried resetting the hot key but it didn't work. I also added it to tool bar
and nothing happens when i press it. I have tried restarting my pc and resetting gmax does
anyone know how to fix.

i know this bug. happened to me 2 times, e.g. 1 week ago.

just reinstall renx with renegadetools.exe (install over your actual installation).

Ok, instead of reinstalling the whole program do this:
1. goto customize at the top
2. Click Customize User Interface
3. Click the keyboard tab on the windows that will pop up.
4. Then click Reset at the bottom.

 I think that might help

this didnt worked for me.

reinstalling renx takes some seconds.
and, if you dont have a very indivially configuration, it isnt a problem.

the only thing a had to do after that is configure the shortcut for the w3d-importer again.
