Ok, I'm totally goin' to freak out here.. Now, i've opened the 2 gates, and fall in to another one. This one has a switch on the other side, so I can't reach it. On the other side, i can see another gate.. Is it possible to get there, or how the hell can I open that gate where i'm now.. (it's the gate near the Obelisk of light, i don't have any laser fences, i broke them, now I have full armor again, destroyed the power plant.. Now i only have to sabotage the Temple of NOD..) Someone?!

LOL, that is the easiest mission in the game.. Maybe you should stick to MP pratice, if you can't figure out that mission you will be doomed in the next one
