I was looking through some posts to do with coop on renegade forums and seems this mod is still used quite a bit so i decided to install a miniserver for 5 players where a small group of friends can play if they want to do a coop game and don't feel like joining a big-ass server where it's everyone for himself.

The server is aimed to provide little groups of people a playing ground where they can rely on teamwork getting the job done.

The server details:

XWIS Nickname: Coop

Server IP: 62.212.66.163

Server Port: 8888

Server Forums: <http://forums.mp-gaming.com/index.php?showforum=56>

Maxplayers: 5

Notes: BHS.dll is forced on this server, without it you get kicked so get the Renegade Update 3.4.4 before you join.

I'm looking for a couple of people who want to moderate the server, send me a pm if you are interested.

The server is reporting ingame status, chat and kills on irc.mp-gaming.com in channel #mp-coop

Have fun on the server

Two screenies for the fun of it:
