Subject: [FULL Release] CoopBeta 3.00  
Posted by [zunnie](#) on Mon, 09 Feb 2009 10:52:59 GMT  
[View Forum Message](#) <> [Reply to Message](#)

---

I was bored today and decided i would have a look at CoopBeta 2.50  
The one thing that always bugged me was the fact there were no killmessages and that donating money to teammates was not possible.

I've completed upgrading CoopBeta 2.50 to 3.00 with:

- Full SSGM 2.0.2 support
- Biatch Anti Cheat
- There are now killmessages both ingame and on irc
- Donating money to teammates is now possible

You can download the new version on -of course- Game-Maps.net:  
[Click here to download CoopBeta 3.00 \(90.0MB\)](#)

Thanks all for downloading, playing and most important hosting CoopBeta

If you have any questions or need help you can find me on irc.mp-gaming.com in channel #BloodyServers  
Have fun

11/22/2009: M02 Fix

Download the fixed M02 map and replace it on your CoopBeta 3.00 Server.  
It will no longer crash when the powerplant is destroyed.

This fix was done by Zorid (nice guy) from <http://www.exoduscommunity.com>

Will put this on PruServ (a0000002n) later today and see if our current scripts like it.

Nice work on the Coop zunnie.

If this is a newer version than the one running now, we will host it  
Will take some time, as we are currently swamped in Nitro Mod work.  
If I could use your expertise when installing the mod, I would appreciate it Zunnie.

It's easy to install, just extract the rararchive and edit server.ini and data/srvcfg\_cnc.ini that's it.  
Nothing else is required to get it working

i want to be able to play that on a lan hosted game \*cries\*  
can't there be a way where it is a multiplayer mod or something?

\*cries\*  
can't there be a way where it is a multiplayer mod or something?

So host a server in LAN mode. That's possible.  
Edit server.ini and set "GameType = GameSpy".

Yes you can

Just start your renegade, be sure to be in the wol listing, then start de coop server. and have fun

Is there a way to set the dificulty for the game/server? It seems to hard when there's only 2-3 players. You able to post a new file that changes the dificulty? Also how much damage it takes to kill stuff (guard tower, samsite, enemy tanks, ect.) and how much damage the enemy does to your tanks, and characters? Also How much I see that the enemy characters do alot of damage or are way to acurate.

All in all is there a way you can make a config file that has all this stuff in it? Please!....

If you give me source I wont know how to edit it at all thats why i ask for a cfg for the CoOp Server Side mod.

I don't have the source for CoopBeta 3.00 anymore so i can't change anthing or fix anything on it.

I'm working on a new Coop 4.0 though so you maybe want to wait for that, as soon as i finish M02.mix i will put up a beta download.

Alright, well I took a look at the second post you posted. Nice to see w/e you were testing works. You going to post a new thread for the CoOp 4.00 version?

Also, i noticed the char. bots are very very accurate. Can you lower that? Or have a big config that set every aspect of the CoOp server? I also noticed the Light tanks do alot of damage. It would be nice to be able to buy havocs, sydney, and mobius. Having CPU Team mate tanks help out that move like the enemy light tank. Why does the NOD Gunner Do so much damage? jw

I have always disabled Havocs, Sidneys and Mobiuses on Coop.  
They are way too powerful against bots, bots are kind of dumb and walk in a straight line etc. Maybe ill put one or two powerups for them..

---

So the 4.0 will be very configurable? Be able to have complete control over the CoOp Server?  
\*like all the stuff I listed in past posts\*

Apparently the map M02.mix is bugged in CoopBeta 3.00  
It is causing a server crash whenever the Nod Power Plant is destroyed.

When i get my pc fixed at the end of this month i will lookup the problem and release a patch for CoopBeta 3.00

Until then i suggest you remove the map M02 from rotation, the other maps are unaffected.

greetz zunnie

MP-Gaming is hosting a server.  
Server nickname on WOL is zzzzzzzzv

IP=85.25.143.169  
Port=7089

irc.mp-gaming.com  
#mp-coop

I installed WOLSpy on the server, it is now listed on RR as well.

The servername is:  
[WOLSPY] MP-Gaming.com - CoopBeta 3.00

Have fun
