You might have seen other german tanks before I will finish those too I want one tank that is in perfect condition.

The only real problem I have is that the treadskin isnt moving when you drive forwards or backwards.

For the rest the wwskin and everything is in place. I will be patching up the skin atm it is a bit horrible.

---

add linear offset to the UV stage, (use VPerSec=0.01 for example)  
of course, only add it to the treat skin

Thanks it works. Now I only have to fine tune that and get working on a better skin.
