You can make one that way and use it with your server.

it's not working

i just tryed about 20 diff names.

there is only one nick on my serial..

OK NVM i was putting in a weak pw they said now i got it...

Is the password exactly 8 characters long, are there no spaces in the nick?

Does it come up with a Message of the day box with an error message in it?

Try this: Startup Renegade go into the chat room inside Renegade and type "/nicks" that should
list all of your nicks you might have more than you think.
