I'm sorry if this has been posted before, but I've noticed something kinda wierd with hotwires/tech and their proxy c4s. When you first buy them you get 5 but when you refill you get 6. Does anyone have a clue as to why this is?

I got C&C [original] but i don't particularly like it. same for TS:FSJust takes too long. in Total Annihilation, fights are short but bloody.In a one on one infantry battle in C&C whoever fired first wins. It takes about 20 seconds to kill a soldier with another soldier, and the one who lives is the one who fired first.

While we're at it, doesn't it really grip your sh1t when your hotwire sets up really sneaky defensive mines - 3-4 head height, in the shadows - only to spot them disappearing coz some idiot wants to spinkle proxy either on his vehicle or all around the AGT/OBE. Wish we could equip a stupid beacon and zap some players.

quote:Originally posted by Arkyd:I ahve the original, but it's so old it won't work on my computer Same here. I have the original C&C for DOS and the 95 version. I have RA1 for DOS and windows too. I managed to get the dos C&C original to run on XP PRO by forcing it into win95 compatability mode but it plays so da\*n fast that a 30 min succesfully completed mission turns into a 10 second failure mission. It goes so fast, that you can't even contral it or press ESC before you hear a "Mission Failed".
