I have a problem that has been mentioned, and I have tried all the ideas, but am way to impatient
and busy to reinstall XP
As seen here

...whenever i try to install renegade after i input my CD key and try to choose an install directory i
get this syntax error message and i cannot proceed any further in the installation process...

...please i need help from any other Vista users who may have had the same problem.
I really want to play renegade again, I haven't for months and months!
If someone has found the solution PLEASE HELP!
