Hello, i noticed the Renegade .INI's doesnt work, i tried to setup a Server (home test server) but it wont create a game channel (Serial is changed, it wont load the Server.ini).

Then i tested some Hud.ini features in my Renegade/Data folder but didnt work (nothing of Hud.ini worked) so whats the Problem? can anyone help?

Does the username you are trying exist or even is the password right?

Sure its right, serial is also right (copyed from RegEDIT)

Now i downloaded something and the .INI seems doesnt work (because the installer doesnt do anything)

Now i downloaded something and the .INI seems doesnt work (because the installer doesnt do anything)

Then it isn't right, the raw unencrypted serial isn't stored in the registry.

Nice thank you, you´re right like always lol, topic can be locked, Server works now with Diffrent Serial (looking at Wittebolx)
