Hey, I played renegade on windows XP for a while but now I have a new pc and I've installed renegade again. When I click on "multiplayer internet", than on "Westwood Online", I can't join and renegade gives me the following message: "Your installed version of Westwood Online is incompatible with this product. Please reinstall the Westwood Online component."

Does anyone know how to solve this?  
(btw I have installed renegade via the first decade)

Oh, sorry, I'm new so I didn't know that this was in it to

But it says: "Download this(<http://apb.game-maps.net/index.php?action=file&id=523>) and run it and select only "WOLAPI" install. It will install the latest version of WOL."  
but when I click on the link, I'll get in a website with 52 downloads, so which one should I choose?

<http://apb.game-maps.net/index.php?act=view&id=523> If one of the moderators could replace that link in the sticky with this one also so no one else has to ask.

That's the third time we update that link. Game-maps should stop changing them :S.

I suggest that we get IronWarrior to tell us if the links have changed in future...
