Search through all of always.dat to find it, there's not too many textures you know.

The moon has two textures.

In some maps you will see a full moon.
Fullmoon.dds

In some maps you will only see half a moon.
partmoon.dds

This brings me back to an old idea of mine - that we should start a wiki of the files in always.dat and their purposes, so people can look it up. In a table with fields like
Filename || Description || Opens with (based on extension, so should be automatically filled in)

Anyone think of anything else that would be useful?

Once we have a good list of fields, I might start this on Renegadewiki.com

---

Suggestions?

If it only contains skins which you can see in multiplayer internet and if they are listed under every kind of category like

Weapons
Vehicles
Terrain
Characters
Buildings

then it would be a good idea

I would love to see a list of all the files and details put together. That would prolly definitely save people a lot of time.

Ok, so they need a category field, perhaps two, for online/offline and then
Weapons
Vehicles
Terrain
Characters
Buildings (Thanks for the list)

Any further suggestions?
