It seems everytime I get back into doing so mapping and it happens to be on a new HD, I always have a hard time finding that huge folder full of all kinds of textures for Ren. I know it was a seperate download from the other renegade tools and it was on the westwood FTP (is that still up?). Anyways, it'd be nice if a link to these could be put in a sticky. So anyone got a link to download them?

is this what you want

<http://ftp.games.skynet.be/pub/ftp.westwood.com/renegade/tools/RenegadeTextures.zip>

Why not just extract every dds from always.dat?

Because then he has to take the time and resave them all to .tga if hes going to use them in gmax /3dsmax

Err... just open the right-pane in XCC, browse to the DIR you want the textures copied to, select them in the left pane, then right-click on one and click on copy as tga.

I posted an animated gif a while ago on the forums on how to sue the second pane - looking for it now.
