I think it looks really good, the actual skin it self. The stealth effect is good also, I can see it is different from other stealth effects i've seen such as copy and paste.

Lol, another great skin, and a cool stealth effect as well, it doesn't give the user a huge advantage either

advantage?   i want a harder game not an easier one

besides, ive been told that it is actually harder to spot an sbh with that skin, however i did measure the brightness of this effect with the brightest part of the original, so that it didnt give any advantage - disadvantage, but, meh. i love it
