I already have the jumpsuit sakura which I think is a very good enhancement to the game, it looks much nicer. The other ones I don't really like.

This comes with the weapon model by Urimas, and my custom texture for it.

Also, a stealth tank reskin.

Image

This comes with both versions of the skin, and a "Ghost" stealth effect.

Now I've got some "Hunter" skins for you. A long time ago, on the EKTRP2 server, we had a job idea for a "hunter" class. They were the elites of the military, and were extremely powerful. The concept got me creating a LCG re-texture of the idea, which seemed to look good.

I later finished the the Pistol Skin I made in the post prior, and a Dragunov skin, which were also inspired by this, and made the screenshot you can see below, along with the artwork that inspired it (which I edited by changing the colours, and adding the SVD and Desert Eagle).

Image

Finally, I made the Nod 500 Sniper skin, in the same style as the LCG. This screenshot has been created now, with the Ren40k Sniper Rifle, not the Dragunov, unfortunately.

Image

The file includes the Hunter Pistol and Dragunov, which were modeled by Urimas and retextured, and the Hunter LCG and 500 Sniper.

The guns made were the Rifle, Shotgun, Sniper Rifle, and Ramjet. In that case I can make something else.

I'm currently making a total snow camo remake for Nod, and then moving to GDI, as part of the whole Snow Renegade thing. Also, I'm changing Nod's helmets to be gas-mask style instead of as it normally is. Currently, the following characters have their camo:

Nod Soldier

Nod Shotgunner

Nod Flamethrower

Nod Engineer

Nod Officer

Nod Rocket Soldier

Nod Chem Trooper

All Black Hand (So the Sniper, LCG and SBH)

Nod Technician

And JsxKeule's Snow-Mendoza, with a small camo change.
