Various people ask me how I make those building interiors. Whats a better way of making a tutorial of it to show it?

For beginners with RenX/3DS Max this could be pretty hard. But I think you should be able to complete it if you take the time  
In this tutorial I showed some things with screenshots, but I also made 2 videos. In those videos I'll show you how to UWV Map to make different paths and getting the textures to allign right.

I hope some people that will succeed following all this can show some of there creations.

Link to the tutorial ->  
Tutorials Overview

If you just want to learn UWV Mapping how I do it then check the videos

Tutorial Interior Modeling UWVmapping Part 1  
Tutorial Interior Modeling UWVmapping Part 2

What should the next tutorial be about? Any suggestions?

I dont like when people put hard type of music on tutorials. They make people get confused while they try to learn something. Those tutorials are shit.(not urs but remove the music man)

<http://ren.game-maps.net/index.php?act=category&id=91>

Get Gmax here  
Get the reg. bypass if it attacks you when you're installing gmax  
If it installs and runs ok then don't bother with the bypass.

Then download and install Renegade Public Tools.  
It's all there on that link.

Read my tutorial better, I tell you there where to download 3DS max  
and just mute the music if you dont like it now make some interiors!!
