Two totally unrelated things, but I've been wanting to know them.

1) The game menu. At the end of the game, the little box with the players. I've been wanting to know the skin files for it so I could change the color and crap. So basically, what are all of the skin files regarding the menu in renegade (Besides back.dds)

2) In Blacky's under/field, he had the tib gas in the tib field. Is there anyway you can have that in all the maps? And if so, would there be anyway to change the color?

Thanks for the quick reply bro And sounds good.

Any word on 1?
