first person and 3rd person have different models.

f\_gm\_gunname.w3d = first person model

w\_gunname.w3d = 3rd person model

w\_gunname\_b.w3d = 3rd person back model

it is the same as w3d. for example:

f\_gm\_flmt.dds - first person flamer

w\_flmt - third person flamer

Also watch out mostly the texture size differs between the f\_gm\_weapon and w\_weapon and some parts might be located differently. (So you cannot copy it over)
