I just installed vista 64 bit. When I go to install renegade the screen just turns black.

I insert the Cd and when the box pops up saying Install, Explore, Install MOH Demo, ect. I click install and the screen just turns black.

I tried opening the renegade folder from the CD and running setup in admin mode with xp sp2 compatibility turned on. I got the same problem.

Any ideas?

Do you hear music or does the screen just stay black?

The screen just stays black. I can't alt+tab out or ctrl+alt+del out either.

I just tried rolling back to dx9 and still nothing.

edit: I got it working. Apparently it was my AV (Comodo AV). After I uninstalled it everything worked fine.
