Here are a few weird but funny staragies1. As Tec/Hotwire plant proxy C4 on enemy Pts at head level. Like a C4 head shot.2. GDI only. Before a tank rushes the OB run ahead and take the hit to let tank survie longer3. NOD only. Basicly same as #2 but this time u will need to run and jump to sorta avoid the auto guns and missles. 4. if base is under major assult. press ESC and kill urself. Then become engi and start repairing. DON" T USE THIS WHEN YOUR IN A VECILE OR A \$1000 CHARACTER!!!These may help but you'll have to try them yourself.

Here's a tactic, become a sniper and go onto the field then send this message to all the people."Purple Monkey Dishwasher" then any thing else that comes to mind (preferably some thing against the other team). Soon enough you'll get some responses from people then all you have to do is look around the battlefield for any stupid people who think its safe to type a hate message back and shoot them in the head.Note: not realy recomended because you might get banned from server.
