Could someone make me a 500 sniper rifle that looks like this:  
with a real sounding shot?

and if not could someone make me a scope (looking into it) that looks like a Real scope?

this kinda stuff goes in the mod forum right above

you could look for the model online and then post it.. i'm sure someone could convert it quick.

the problem is, it's cut from one side, but ren's weps are right handed, but the awp is cut on the right.. so u won't get it to work right. Check out the mod release forums there is an awp
