this forum is only for releases, click on the forum above called "Mod Forum"

Jelly has some good HUDS here

In my opinion, download the Blue Tiberium HUD located on that site. I've been using it for a year or so now and it never get bored of it.

You want deathlink's HUD here, I suggest andrew's update here. I'll browse the forums and try to find it for you

You also need scripts 3.4.4 here.
