to import you must go hammer icon > max script > in the drop down me select w3d import
export>scroll down and select import to export use File > Export

No it isn't already there..

Download it here. Read the Readme that's included and it will tell you how to install it:
<http://ren.game-maps.net/index.php?act=view&id=1002>

ErroR wrote on Wed, 22 April 2009 15:52to import you must go hammer icon > max script > in the drop down menu select w3d import export>scroll down and select import to export use File > Export

You have to first install it into your gamepack directory before you can do that..

You have to set it up.

Right click on an open spot in the top toolbar and go to customize. Scroll down to "Import a W3D file" and click and drag it anywhere on the toolbar. It is an invisible icon, but when you click on it, you can import W3Ds.

If there is, I don't know about it. It isn't that bad though, just remember where you put it and you will be able to find it fine.

I say that because ---> E:\gmax\gamepacks\Westwood\RenX\ui\icons

These are supposed to be the icons.

Well, I tried to edit the button's icon, but it wont work. Every time I apply a new image or make a text label, it just shows up invisible.

Anyway, this is how it looks for me:
