ok

i downloaded scrins ramjet (the first one he released) long time ago

when i played with it my renegade shut down after bit time i saw in game.

then i downloaded his turbosquid ramjet cause my renegade crashes now it shuts down too

after that i downloaded the reborn ramjet again adn my renegade

shut down too with the reborn ramjet

how i can fix that

yeah i would say that too

but it really sucks when i play online in a veh and my ren crashes when a sniper comes near to me

maybe i can try not to play with a model

omfg.-

i play without model

and my ren crushes

i have reinstalled
but it works now
ins crins proto ramjet .zip file was any nod buggy.w3d file
that crashes my renegade lol

there was a file named
mz_nod_buggy.w3d or something liek this
and this file crahed my ren

But that dosen't make sense, if a file for example, your file, is not connected to ren (as in that file is not used durning the game or at all) then it would not matter or even make a dirrfrence.

So I have no clue why and how could it crash your ren.

maybe it doesnt make sense
but i deleted the file from data folder

and now it works
and thats the important thing

cause your pc is not from 2001
like mine
