Well here it is...

I would have added a spoiler but, the pictures did not work in them.

Expand the tree as shown and click on "Modify" on that preset there 'CnC\_Beacon\_NukeStrike'

Since I am doing this tutorial for Nod I am using this preset.

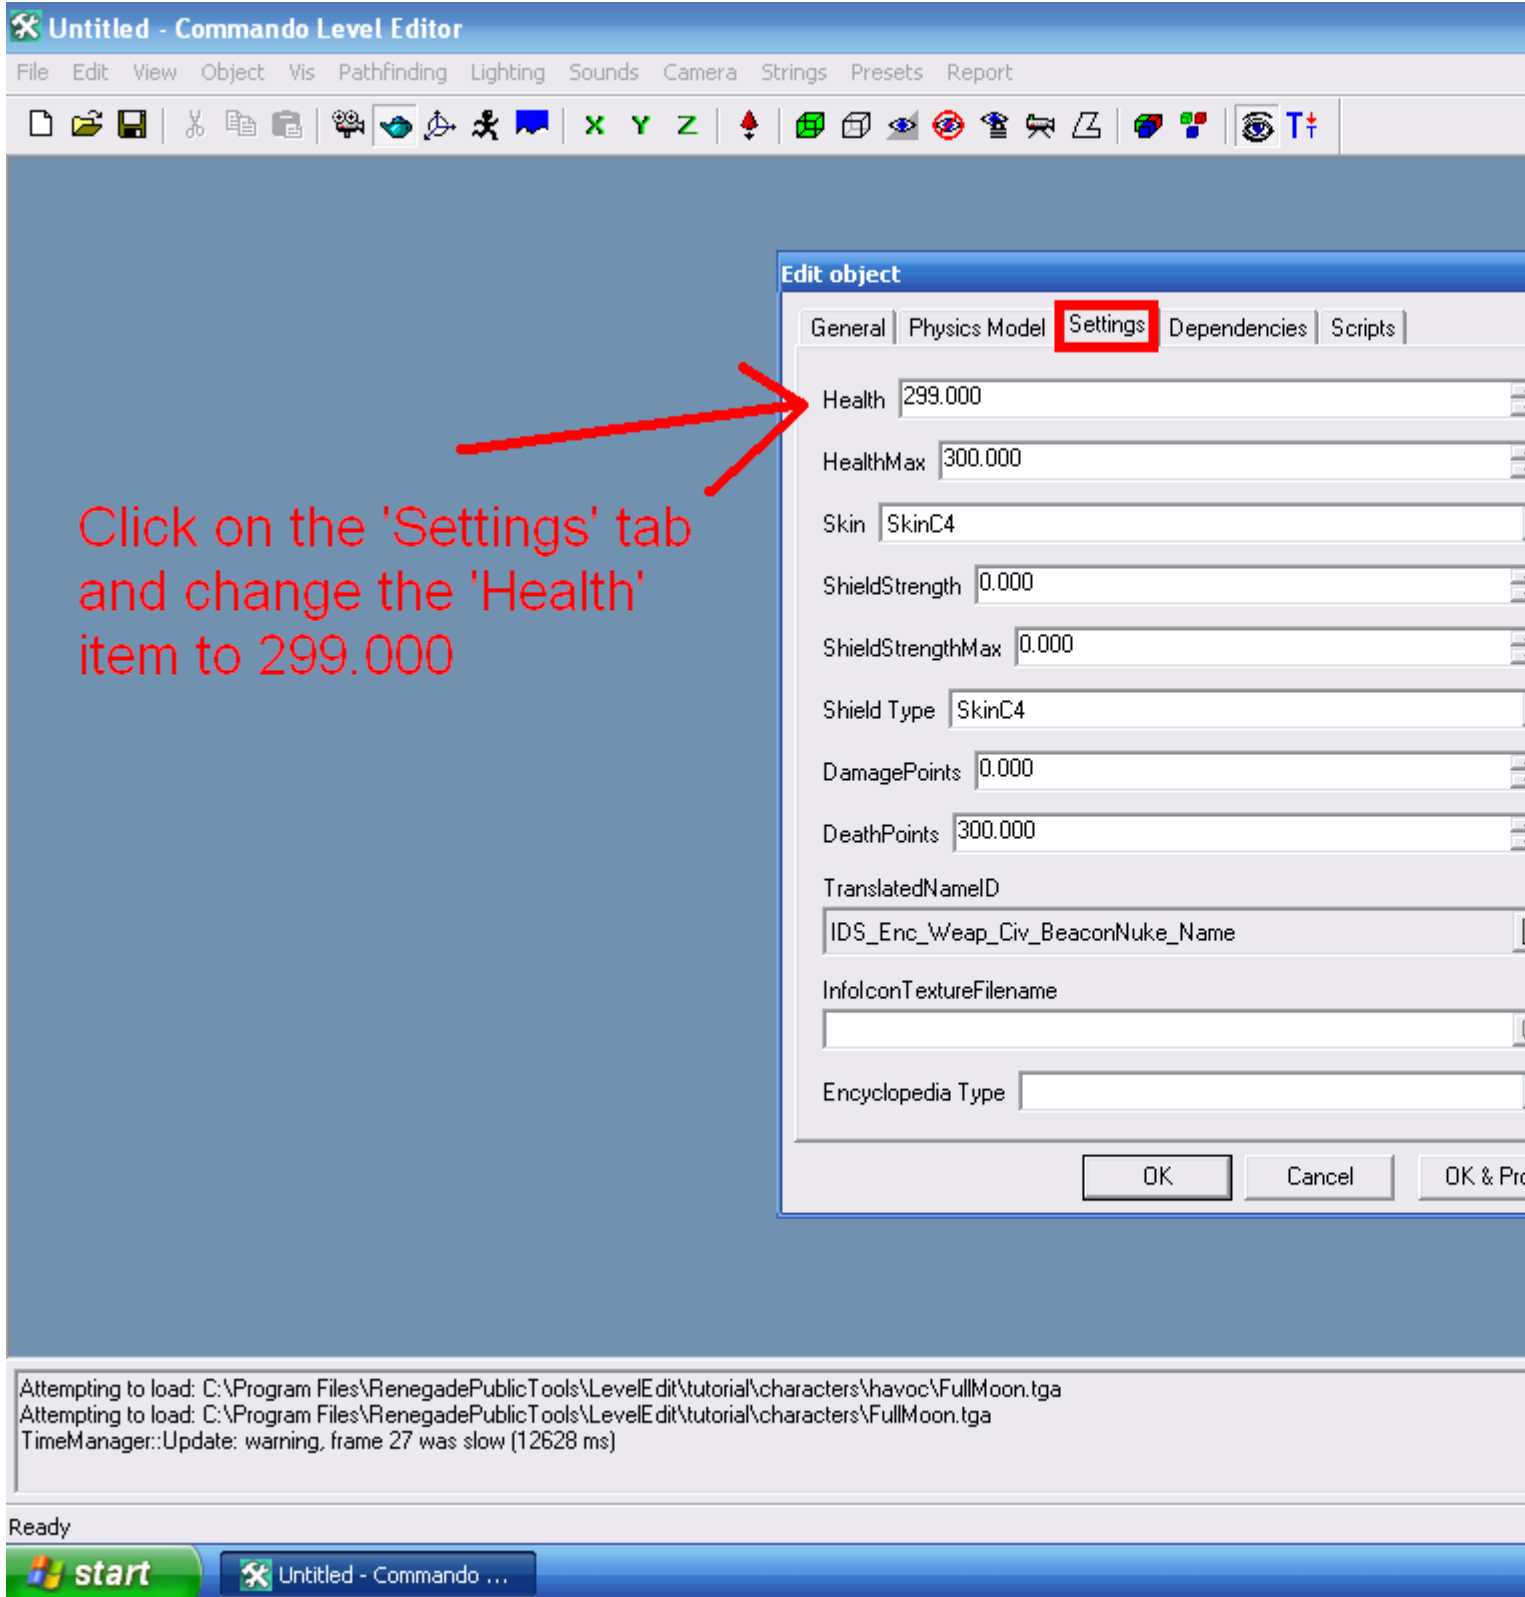

However if you would like this for GDI then expand the tree named 'Ion Cannon' and Modify the 'CnC\_IONCannon\_Strike' or something like that.

Now add the script 'TFX\_Replace\_When\_Repaired'

Set the preset name to the item that you want to make (must be the exact name)

The DropHeight depends on the object I would recommend for something like a vehicle to be about 15 and for infantry to be about 8

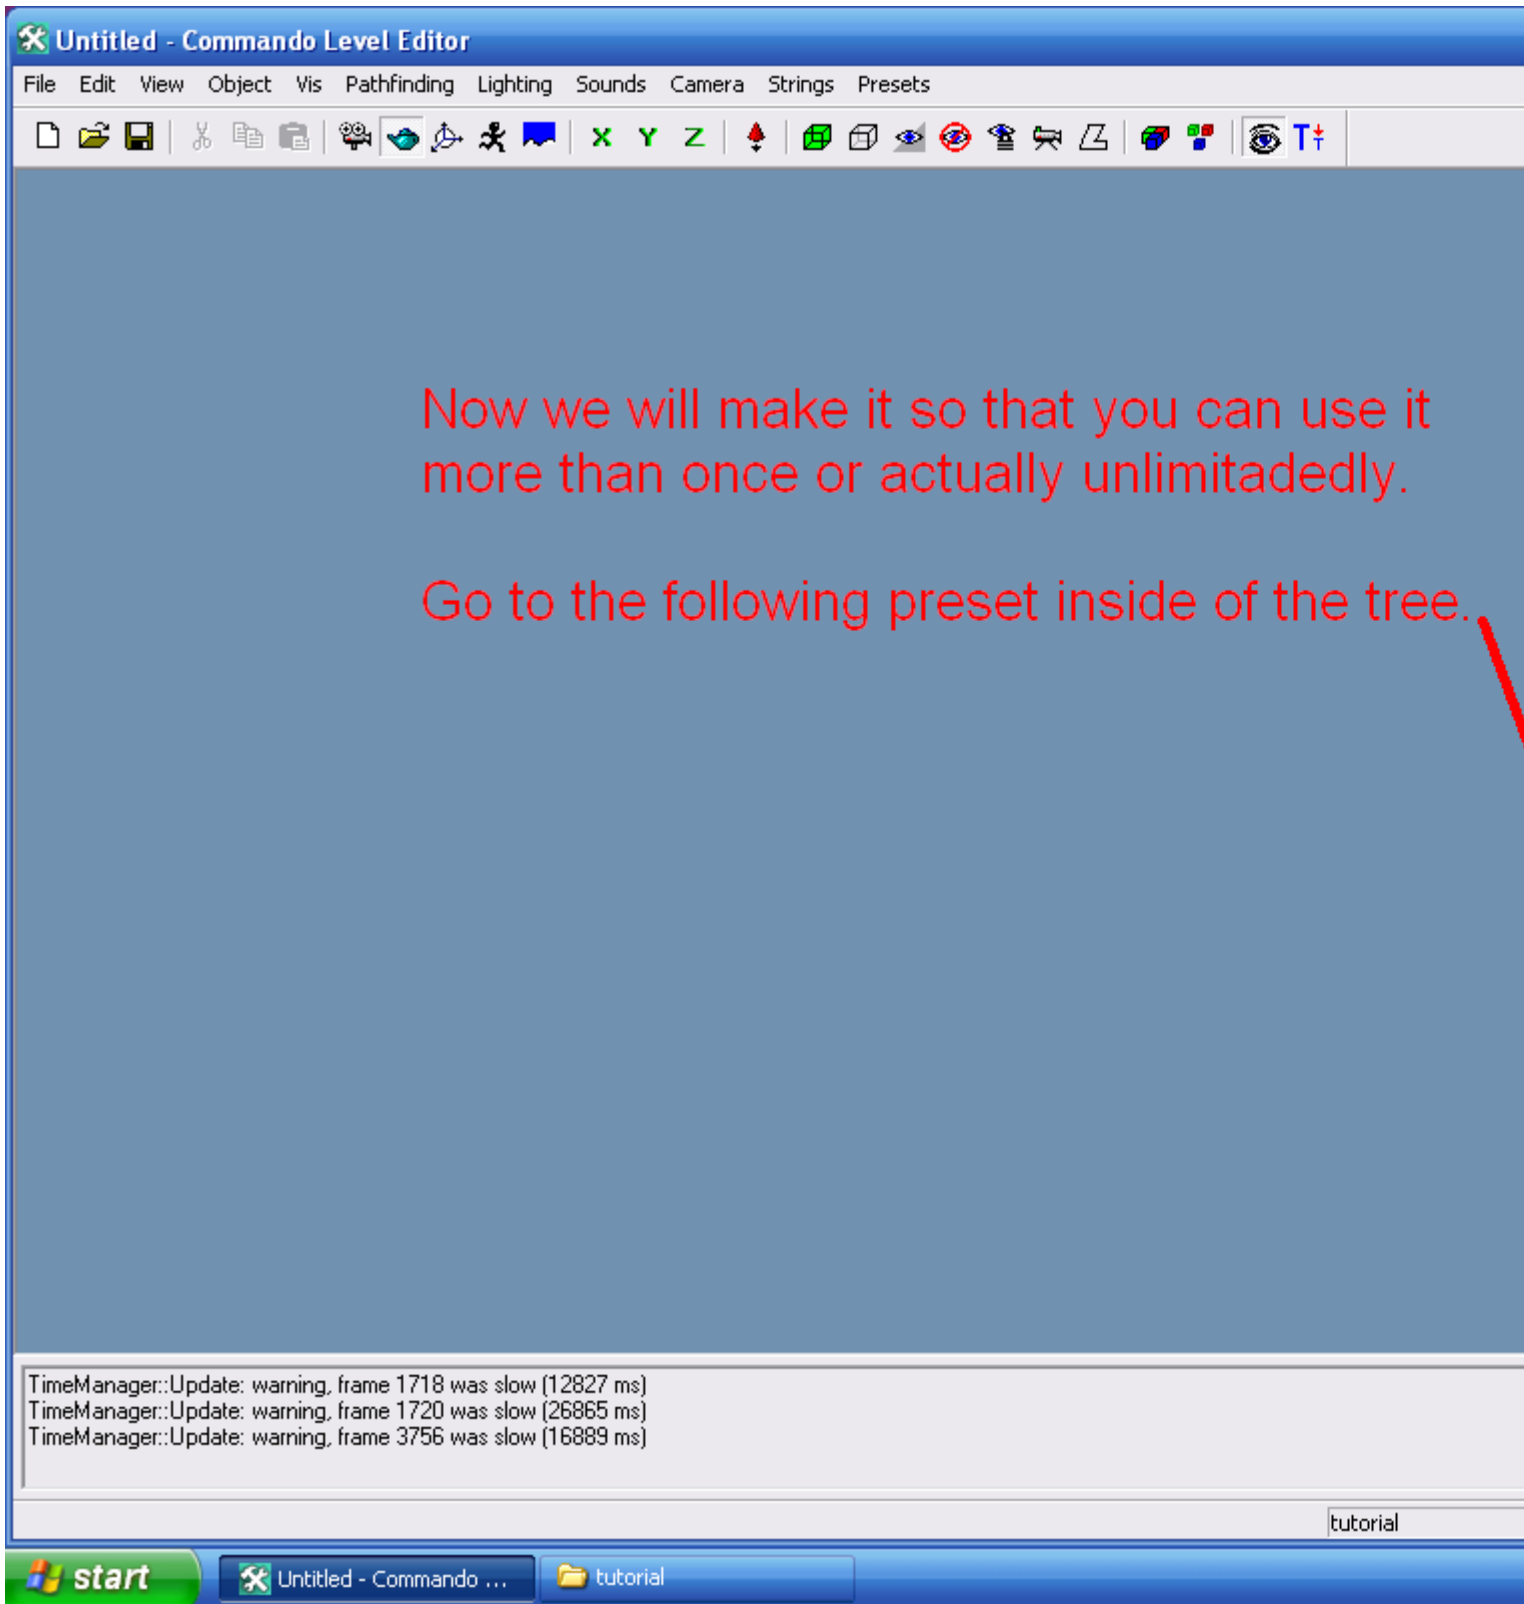

The Health and Armor percent must be the same #'s as the object you are making.

I am making this to spawn will fill in the correct #'s for

Add the script  
'M00\_GrantPowerup\_Created'  
and then put the exact name for  
the parameter. Should be  
'CnC\_POW\_Nuclear\_Missile\_B  
eacon'

Now once everything should be  
set, exit the program and it  
should give you a dialouge  
asking you if you want to save  
the presets library.

Click Yes and give a min to save don't rush or it will freeze and break and it will be all your fault! :<

10) [10.PNG](#), downloaded 202 times

Now copy the obj  
the  
'C:\Westwood\Re  
directory

Run the game!

I will join team Nod on  
Multiplayer Practiece just to  
show you what you have  
done.

Not a bad tutorial.  
Can make Multiplayer Practice fun, eh?
