the blood looks good
but the original gdi apc look shitty
so make the apc first a bit darker or a totaly new texture
then make the blood

It's pretty nice. Just the blood on the top shouldn't be a straight line. [Unless the body was dragged all the way at the top lol] Sorta make that be spotty, have blood spots here and there, a few trails and shit.

But yeah, a better texture then the original could help out with making the blood fit better and stand out more.

Not my type of skin.
But, to be fair, it looks good, I'd be quicker to get out of the way of that...
