Wiki 1

Quote:Command & Conquer: Renegade 2 (Canceled)

See also: Tiberium (video game)

Command & Conquer: Renegade 2 was to be another first-person shooter game using an updated version of the "Westwood 3D" engine. Renegade 2 had two build versions. The first version of Renegade 2, was drafted as a connection to Command & Conquer from Red Alert 2. However, this was scrapped in favour of a Red Alert 2 based FPS that took place in the post Yuri's Revenge world. The storyline was about a rogue Soviet commander attacking America to avenge the honour of Premier Romanov (The commander was a Romanov). Most units designed were based on Red Alert 2 styles, however the Allied Light Tank, and Soviet Hind Gunship made a return.

Wiki 2

Quote:Tiberium is a canceled tactical first-person shooter video game title set in the Command & Conquer universe, that was in development by EA Los Angeles (EALA).[3][4] Tiberium was initially revealed when shots of the January 2008 issue of Game Informer were leaked,[5] but was officially announced by EA just a day after. Prior to the announcement, the game had been in production for two years.

In the first previews of the game by GameSpot and IGN, it was confirmed Tiberium uses a game engine based on Unreal Engine 3.[6][7]

On January 18, 2008, a trailer of Tiberium was released on GameTrailers with a message of more to come on January 25. It would have been, to date, the only C&C game not to include "Command & Conquer" in its title.

Tiberium was cancelled on September 30, 2008 due to the game's failure to meet "quality standards set by the development team and the EA Games label".[2]

The short of it was that Renegade didn't make enough money, so EA figured Renegade 2 (and Westwood, really) wouldn't make enough, either.

It's a shame that they never finished Renegade 2. I still love the original, and the sequel was supposed to improve on areas where Renegade ad lacked. Oh well.

As far as I know, Renegade 2 was set right after RA2, and was meant to be a precursor to Tiberian Dawn.

To quote Chuck Carter from the original Westwood,

"The level was finally based around a scavenger culture that eventually turns into the organization known to Command and Conquer fans as Nod."

The Scavengers are the fallen Soviet empire, which had used technology from the former Soviet Union to fight against the Allies. Here was the logo of the Scavenger faction:

The reason it was cancelled was because BF'42 and doom3 were about to be released back then, making ren2 look like fail in comparison according to EA's opinion, combine that with the fact that renegade never sold very well... yeah.

Someone already did. Go check out the Renegade: Sole Survivor mod. Download.com has it here (but the download's capped at 50k/sec for some reason). You can also find it at tsugaming here and the 1.02 patch also at tsugaming here. It's too bad this mod never took off, because it's the first feature-complete mod ever released for Ren (and it even had a singleplayer mission).
