Wiki 1
Quote:Command & Conquer: Renegade 2 (Canceled)
See also: Tiberium (video game)

Command & Conquer: Renegade 2 was to be another first-person shooter game using an updated version of the "Westwood 3D" engine. Renegade 2 had two build versions. The first version of Renegade 2, was drafted as a connection to Command & Conquer from Red Alert 2. However, this was scrapped in favour of a Red Alert 2 based FPS that took place in the post Yuri's Revenge world. The storyline was about a rogue Soviet commander attacking America to avenge the honour of Premier Romanov (The commander was a Romanov). Most units designed were based on Red Alert 2 styles, however the Allied Light Tank, and Soviet Hind Gunship made a return.

Wiki 2

Quote:Tiberium is a canceled tactical first-person shooter video game title set in the Command & Conquer universe, that was in development by EA Los Angeles (EALA).[3][4] Tiberium was initially revealed when shots of the January 2008 issue of Game Informer were leaked,[5] but was officially announced by EA just a day after. Prior to the announcement, the game had been in production for two years.

In the first previews of the game by GameSpot and IGN, it was confirmed Tiberium uses a game engine based on Unreal Engine 3.[6][7]

On January 18, 2008, a trailer of Tiberium was released on GameTrailers with a message of more to come on January 25. It would have been, to date, the only C&C game not to include "Command & Conquer" in its title.

Tiberium was cancelled on September 30, 2008 due to the game's failure to meet "quality standards set by the development team and the EA Games label".[2]

The short of it was that Renegade didn't make enough money, so EA figured Renegade 2 (and Westwood, really) wouldn't make enough, either.

And EA wonders why no one likes them...

They should at least release yhe models and stuff that they had created so far instead of just dumping them.

Modders of Renegade? They work on APB, Reborn, APOC, RP2, Scud
Storm. The other Big Modders work on own one man mods or little
Projects like Reborn (guy) with his Plugins. Im currently away
from Modding, i dont do anything the last time, im busy, got
bored from sitting infront of my PC

Active BIG Mods:

C&C Reborn
A Path Beyond & Apocalypse Rising
The Brotherhood
Renegade: Scorched Earth (no Homepage yet) by me, Reaver and Di3HardNL (we search some
Helpers)
Roleplay2
Scud Storm
Battle for Dune

It's a shame that they never finished Renegade 2. I still love the original, and the sequel was supposed to improve on areas where Renegade ad lacked. Oh well.

As far as I know, Renegade 2 was set right after RA2, and was meant to be a precursor to Tiberian Dawn.

To quote Chuck Carter from the original Westwood,

"The level was finally based around a scavenger culture that eventually turns into the organization known to Command and Conquer fans as Nod."

The Scavengers are the fallen Soviet empire, which had used technology from the former Soviet Union to fight against the Allies. Here was the logo of the Scavenger faction:

The reason it was cancelled was because BF'42 and doom3 were about to be released back then, making ren2 look like fail in comparison according to EA's opinion, combine that with the fact that renegade never sold very well... yeah.

you can see his signature "TAS 2002" or sumfin

Someone already did. Go check out the Renegade: Sole Survivor mod. Download.com has it
here (but the download's capped at 50k/sec for some reason). You can also find it at tsugaming
here and the 1.02 patch also at tsugaming here. It's too bad this mod never took off, because it's
the first feature-complete mod ever released for Ren (and it even had a singleplayer mission).

I attached a quickie video of how the Sole Survivor version behaved. Looks like they didn't bother matching the reload animation to what it looked like in the Renegade alpha/beta videos - it's seems they just used the autorifle's reload animation. Meh.

Meh.

Easy to do convert that model
Bone it so its the shotgun
Edit the hand positions
Make a new reload and a new firing animation
ill try and post up a beta footage of renegade
