Black screen when?

If it's before you see the main menu, reinstall scripts 3.4.4 (<http://4camp.net/scripts344.exe>). If it's when you try going ingame, go into your data folder and remove "sceneshaders.sdb".

ok i installed script 3.4.4 and now it says i need bhs.dll to run on 2000/xp/vista/2003

do i just get it from the internet or ????

Are you running Vista? Did you run the scripts installer in admin mode?

uninstall it and this time use this link to install it.
Sad thing is I actually bookmarked scripts 3.4.4

The only thing I can advise you is to reinstall everything, following the steps in the sticky about reinstalling Ren. Something seems to be seriously fucked up...

Please also test if it still works after each step you installed. So do step 1, then test before going to step 2. That way you can know exactly what causes your problem.
