Ok this is nothing big so i put this in general discussion.
Every time i quit to windows from renegade a message pops up
that says renegade has encountered a problem and it begins
looking for a solution. anyone with vista have this happen? this
does not screw with gameplay i just want to know.

dont worry about it

i have this happen alot of times

For me it just happens probably i got a slow computer or i have a shitload of .w3d files
