zukkov have you downloaded and installed the new server package? It's a separate 54mb prog or so. I don't think patching the game is enough. I put it on last night and the .ini includes flying maps in the rotation.Also noted in the post-install info that there are now servers in London, Sweden and somewhere-I-forgot. Still only the original 3 (Pac/US/Eur) options in the .ini though. Hope this isn't the end of the expansion...
