Hi,

I just installed the UberMapPack and now C&C Renegade crashes when loading any map/game... (Multiplayer (-LAN, -Practice))

Quote:Renegade crashed at offset 0x12003A07 with error code 0xC0000005.

Any ideas how to fix this other then re-installing C&C Renegade?

I had Core Patch 2 installed and resurrection v1.1.2.101 (for installing the UMP)

UPDATE: ok looks like there is something more going on...

I re-installed renegade + patch 1.037 and Core Patch 2 and Scripts344...

Still doesn't work... when map is loading there is no text in the screen and it never finishes loading it just quits...

I really could use some help with this... thanks

Can someone please help me

Renegade doesnt load maps or games anymore

it doesn't come much further then attached screenshot..

Try replacing your D3D8.DLL with the one attached

If you have The First Decade put it in "C:\Program Files\EA Games\Command & Conquer The First Decade\Command & Conquer Renegade(tm)\Renegade\
Or if you have the original : "C:\westwood\Renegade\

Thanks for the reply!

I got Renegade working again, it seems Scripts3.4.4 didn't work for me...

ok hey guys i got scripts running after finnaly finding a tutorial and so i thought well thats easy so im gonna download the ubermappack. when it downloaded i put it in the sme folder as my scripts (not the data file) and thought it would work. However when i went to start the game ii heard the sound from the intro but couldnt see any images. I have a black screen the instant i hit play and am not able to play.I also cant just delete it cause i dont know what the ubermappack's file is called. (i have the first decade version and 3.4.4 scripts) any help would be great thnx

If you get no text simply restart your pc and try it

You got a black screen with sound? Reinstall Scripts 3.4.4 as the map pack must have overwritten a scripts file somewhere.

Also, the map pack goes IN your DATA folder, otherwise it won't work.
