Ok so I went to reinstall Renegade and I was struck with an issue that I can't seem to figure out.  
Note: I am working with Vista

This is the issue that pops up....

Feature: Command & Conquer Renegade  
Component: Renegade  
File: E:\data10.cab  
Error: Incorrect Function

Finding a solution has stressed me out and I would greatly appreciate some help or advice. If no one can think of the solution, let me know so I can get over it ;\_;  
Thanks in advance!

dude, i highly sugest u get windows xp, because vista is brutal. all new things like vista, or even xbox 360, shouldn't be bought until they have been out for a few years so that the companies can sort out any issues. by the way, its worth getting xp to play renegade, itz sick.

Vista is not the problem.

@Shidaro:

Either your disk is dirty/scratched/otherwise unusable, or your disk drive is dirty/otherwise unusable. If you recently purchased the disk I'd recommend taking it back to the retailer and having it replaced, otherwise there are other ways \*coughcough\* of acquiring the disk and installing it with your serial number.
