The general shape isn't bad but, before you do anything else, make it symmetrical!

when you make a reticle, make it white. when you point over enemies and whatnot it looks like crap if it's colored. as for the actual reticle, i don't really like it.

How about you actually provide some feedback instead of saying "i don't like it". The kid shows he's eager to learn, to improve, so help him.

On topic: I have to agree with glocks here, making it white is better. I also suggest you delete some lines from the center, because right now the view is obscured.
