Hi,

Firstly I apologise if this has been discussed previously but I cant find any recent posts.

Firstly how do I stop the glitching on Glacier? Sometimes it will suddenly start freezing my session.

Is there a script that fixes it? If so could you kindly post a link to the latest scripts?

Many thanks

Freezing, mainly FPS drops and spikes. No its not my computer, every other Westwood map works fine, just Glacier seems to do it. The only way to fix it is to exit the game, sometimes its pointless because it just starts happening again.

Someone whos played this for a while will know what i'm on about. Just wondering if it ever got fixed thats all.

It's just the map.

yea it could be the map

hence why jelly-server removed it from their rotation, becuae of the massive lag on the server

Yes i'm aware it is the map.

Was it ever fixed? Does TT intend to fix it?

No, there is no current fix for it, TT has fixed the c4 bug where all of the c4 are attracted to one spot of the map(I guess it's more known as the repair pad glitch), not sure about the map as a whole though.

i think theres also another glitch

In the nod base theres the plane wreckage
When u drive ur vehicle into too hard it get stuck

The map as a whole would probably benefit from the general improvements TT has made, we'll have to see.
