To prevent trouble, or if you want to remove this bloom make sure you back up SHADERS.DLL

You need scripts 3.4.4 and enable shaders in Renegade options.

I don't think you need to see screenshots, as you probably have seen quite alot already

Enjoy.

from Scrin? x)

from Scrin.. but Scrin made it ugly but enjoy it peoples blooooooom for you

edit: ah nooo I forgot that's not the original bloom from Scrin he told me that the bloom which he gave to Di3HardNL is just a fake of the original one..so he gave Di3HardNL not the original of him...well he like to trick the peoples..

It's not against any forum rules but releasing elements that someone gave you privately, explicitly asking not to release them, isn't exactly the most fair thing one can do. That's all I'll say about that.

[View Forum Message](#) <> [Reply to Message](#)

Thank you di3hard. I'm not sure if it will work, but I'm glad someone released it. I just must have been doing things wrong because this works.. It's pretty subtle and not too overwhelming

Works fine for me, but DAM, it's really bright! lol

For some reason, it's less bright on a screenshot though.

Edit: Some skies are screwed due the bloom; Hourglass sky is almost green lol.

Edit2: Lights are messed up too from a distance. The 'bloom' litterly 'moves' when moving your character. Areas around the Obelisk top turn red too (see Under). It seems that the bloom is really overdone. It looks good, but some maps get really weird lighting.

Something is wrong with my mammoth tank... I don't know if it's your bloom but I'm pretty sure I deleted the mammoth thing from the "normal maps 1" thing.

The flame tank is messed up too. whats the deal?

See The Problem?

I get that too - On the flame tank also.

Custom textures dont seem to do that though. none fo the C&C3 ones I've downloaded black out, maybe someone needs to maek a mammoth and flame skin in C&C3 colours?

At first I thought it was a custom texture. I took my skin out and it's still doing it.

Im not sure exactly, but i have gotten that "black weird thing" across my mammy and flamer before. Without any modifications to the game whatsoever. I always thought it was some shit i downloaded at some time and added. But realised after installing ren a few times, its some kind of corrupt install.

well, installing is a big hassle.. dont think i'll be doing that. thanks though.

Any other ideas?

Check if you have v_gdi_mammth_n.dds and v_nod_flame_n.dds in your data folder. It seems that Renegade can't find the texture for those normal maps.
